

Soil Saver Backyard Compost Bin

By Triformis Corporation

- Converts yard trimmings and fruit/vegetable scraps into compost for house/garden plants and fruit trees
- Made from 100% recycled material/BPA free
- Dimensions: 28" W x 28" D x 32" H (fully assembled)
- Capacity: 11.5 cubic feet/86 gallons
- Weight: 27 lbs (empty)
- Snap together assembly
- Weather resistant construction with UV stabilizers
- SoilSaver is packaged unassembled in one box for easy transporting, shipping, and storage
- Walls of bin have air holes for ventilation to maintain proper temperature and aerobic conditions
- Easy to stir and mix for aerobic decomposition
- Locking lid for depositing organic waste
- SoilSaver contains 4 interchangeable panels with 2 slide up door openings at the side bottoms for harvesting compost
- The ¼" thick structural foam, recycled plastic is built to last and hold the heat inside
- Efficient square design, ideal for all backyards
- Conserves limited landfill space in compliance with waste mandates
- Empowers citizens to reduce waste
- 2 year limited warranty against manufacturer defects
- Base shown here is sold separately; keeps borrowing animals out of compost pile
